

# #GiveDataPurpose in a multi-cloud world

12 ways to create business value from data  
with SAP® Business Technology Platform

# 12 WAYS TO CREATE BUSINESS VALUE FROM DATA

## SAP Business Technology Platform

- 1 Open data integration
- 2 Cloudify data warehouses
- 3 Data self-service
- 4 Centralize master-data
- 5 Intelligent data governance
- 6 Flexible data-tiering
- 7 Data access for data scientists
- 8 Combined planning and analytics
- 9 Simulative planning
- 10 Scalable enterprise architecture
- 11 High-speed process integration
- 12 Modern apps and processes without coding

## Introduction

**Up to 95%** of data in companies resides unused in siloed databases, archives, and data warehouses, distributed across infrastructure providers and hyperscale cloud providers. Thousands of companies worldwide use SAP® Business Technology platform to give such data purpose.

**SAP Business Technology Platform** is optimized to leverage SAP business semantics and business processes to integrate leading technologies that make your data readily available for your business. This comprises technologies to access any data source securely, increase data quality, govern data consumption, automate data processing, as well as to analyze and use data in every step of your business process – by any business user.

**On the following pages**, you find 12 ways to generate business value from data out of any source and hyperscaler by the powerful capabilities of SAP Business Technology Platform.

- Open & multi-cloud
- Integrate with hyperscalers
- Leading technologies
- Easy to use
- Optimized for business value

“*Businesses don't just want to run. They want to **grow, expand, innovate, extend** and **disrupt**. All of this is possible with SAP Business Technology Platform.*”

Scott Russell  
Executive Board Member | SAP SE

# SAP Business Technology Platform is a leader

SAP Business Technology Platform is globally recognized as leading in many disciplines. Its services are the engine for global business processes in more than 25 industries.

# Open and flexible data integration between SAP and hyperscalers

Modern enterprise architectures consume data and services across multiple hyperscale cloud providers, such as Amazon Web Services, Google Cloud Platform, and Microsoft Azure. With SAP Data Intelligence Cloud and SAP Data Warehouse Cloud, you can flexibly consume and connect any data from any source, via direct access, federation, with and without replication.

Data from  
**any**  
hyperscaler

Connect & consume  
any data source

Pre-built integration &  
business content

Combine & govern  
data across sources

## Database & Data Management

### SAP HANA Cloud

Fast data integration, processing, and storage

### SAP Data Intelligence Cloud

Integrate, enrich, and orchestrate disjoint data

### SAP Data Warehouse Cloud

Connect data federated or replicated

# Cloudify your data warehouse efficiently

Shift your data warehouse to the cloud to gain agility, scalability, and elasticity without rebuilding from scratch. With SAP Data Warehouse Cloud, you can immediately reuse your existing data models, integrations, and skills in the cloud, step-by-step. Reduce project risk and cost by using pre-delivered content.

Pre-built content worth  
**>24k**  
person days

Make your data warehouse scalable, flexible, & agile

Accelerate the shift to the cloud

Capitalize on existing SAP Business Warehouse investments & skills

Reduce risk & cost with pre-delivered content

## Database & Data Management

### SAP Data Warehouse Cloud

Connect data with business context

# Provide self-service data for business users

Most data users depend heavily on IT specialists to provide data access and reports. With SAP Data Warehouse Cloud, you can create dedicated data spaces for any user to model, explore, and share their data in a governed and secure environment, preserving the business context of all data. This allows flexible self-service data access and use, independent from IT.

**10x**  
faster data access

- Business users flexibly model, explore, & share any data in their space
- Use data independent from IT
- Provide a governed & secure data environment
- Preserve business context for data

## Data Management & Analytics

### SAP Data Warehouse Cloud

Connect data with business context for empowered decisions

SAP Business Technology Platform

# Provide a single source of truth for master data across SAP and non-SAP applications

Integrate your master data organization-wide across SAP and non-SAP applications and manage it centrally to provide a united, trusted view into your business. With the SAP Master Data Governance application, you obtain this master data management layer through SAP Business Technology Platform.

**90%**

less creation time for master data\*

Single source of truth for any master data

Integrate SAP & 3rd party master data

Reuse SAP data models, business rules, integrated workflows, & UIs

AI for master data quality assessment & remediation

## Database & Data Management

### SAP Master Data Governance

Improve consistency of master data

### SAP Master Data Integration

Share and synchronize master data

SAP Master Data Integration – Discovery Center

\*Customer Example: Döhler and SAP

# Simplify data governance with intelligent technologies

Ensure continuous, enterprise-wide data governance to use information as an asset through all phases of data usage, from data processing, data discovery, data mining, to information trading.

Automate and support the gathering of information about the location, attributes, quality, and sensitivity of your data to make informed decisions on which datasets to publish and determine who has access to use or view information about the datasets.

## Data Governance

### SAP Data Intelligence Cloud

Improve consistency of master data

### SAP Data Quality Management

Data cleansing services with pre-built integrations

SAP Business Technology Platform

Replace  
**100%**  
of manual steps\*

Transparency for distributed SAP & non-SAP data (metadata catalog)

Assess data readiness & ensure data quality in the same platform

Simplify enrichment, validation & classification by reference data & ML

Re-use existing artefacts from SAP solutions for EIM (on-premise)

# Optimize cost and performance with intelligent and scalable data tiering

Data tiering allows companies to access hot, warm, and cold data from one centralized place. With SAP HANA® Cloud, you can easily manage and access all data within a single solution, from data in-memory, on disk, and even in petabyte-scale data lakes. SAP HANA Cloud's data tiering helps enterprises balance storage, performance, and costs.

## Terabytes

of inexpensive long-term storage\*

Store petabyte-scale data cost-effectively

Seamlessly move data between hot, warm, & cold

Integrated data lake for business & individual use cases without moving data

Fuel your AI/ML applications with large amounts of data

### Cloud Data Lake

#### SAP HANA Cloud

Use flexible multi-tiering data storage based on demand

#### SAP HANA Cloud, data lake

Manage storage for low volatility data with a cloud data lake that integrates across data tiers

\*Customer Story: NHL

# Provide simple access to SAP data for data scientists

Data scientists need access to SAP systems to explore data and train algorithms. Raw data exports, however, lose all business context of such data. With SAP Data Warehouse Cloud, data scientists access data within its business context – fully independent from IT. They can directly apply 3<sup>rd</sup> party ML tools and leverage SAP HANA's high-performance data pre-processing and ML capabilities. Furthermore, SAP Data Intelligence Cloud helps you to productionize ML projects and enrich business processes by providing ML-driven insights.

**>50%**

time saving for data access & preparation

Connect any data sources (SAP & non-SAP)

Explore data in dedicated data spaces

Preserve data's business context

High performance data pre-processing & ML

## Data Science

### SAP Data Intelligence Cloud

Deploy ML in business processes

### SAP Data Warehouse Cloud

Collect and combine data from any source

### SAP HANA Cloud

Preprocess big data in-memory

# Provide integrated real-time analytics & planning in one single solution

Most companies use disconnected data, tools, and processes for business analytics and planning. With SAP Analytics Cloud, you consolidate planning and analytics functionality in one tool and user experience. This allows you to embed augmented intelligence, simulations, predictive insights, and advanced visualizations directly into the context of your planning processes. With live access to SAP data, you can instantly analyze deviations from your actuals and plans without replicating data.

## Analytics & Planning

### SAP Analytics Cloud

Self-service analytics and planning

SAP Business Technology Platform

## From weeks to hours

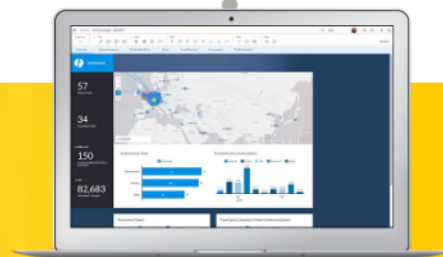

for financial forecasting\*

Actuals & planning data consolidated in one data foundation

Analyze data in real-time without copying

Work autonomously in a self-service environment

Pre-built, integrated business content for planning & analytics

SAP Analytics Cloud

\*Customer Example: Roche

# Deliver predictive business planning

Companies need to respond to disruptions within their markets quickly, ideally even before they happen. Disconnected planning with standalone spreadsheets and solutions are too slow and error prone. With SAP Analytics Cloud and SAP Profitability and Performance Management Cloud, companies can collaboratively plan, predict, and simulate, any business impact of events and actions in one unified environment. This enables predictive planning and budgeting enterprise-wide on any data.

Automate  
**70%**  
of forecast data entry points\*

Powerful what-if analysis, simulations, & predictive planning

Easy modeling of complex value calculations & allocations

Pre-built planning applications & business content

Fully integrated, enterprise-wide business planning

## Analytics & Planning

### SAP Analytics Cloud

Self-service analytics and planning

### SAP Profitability & Performance Management Cloud

Modeling complex calculations & allocations
